Live Burn Demonstration

Location: Training Grounds, 789 Response Ave

Watch First Responder crews conduct a controlled live burn training exercise and learn how firefighters coordinate suppression, search, ventilation, and scene safety. Instructors will explain the purpose of each operation and how realistic training improves performance on actual incidents.

What You Will See

- Pre-burn safety briefing and incident command setup
- Interior attack and hose advancement techniques
- Ventilation coordination and accountability procedures
- Post-incident review led by training staff

Viewing areas will be clearly marked, and staff will be available afterward to answer questions about training standards and firefighter readiness.
