Historic Apparatus Walking Tour

Location: Starts at the Fire History Museum, 123 Heritage Lane

Take a guided tour through the history of emergency response in the district. This walking program highlights legacy stations, retired apparatus, and major milestones that shaped modern fire and EMS operations in the community.

Tour Highlights

- Historic engine and ladder displays
- Stories from major incidents and turning points in the department's history
- Evolution of protective equipment and communications tools
- Preservation efforts led by the fire history committee

Wear comfortable shoes and be prepared for a moderate walking route.
